

Full Outsourcing of DBA Maintenance, Support, and Management

If you are short on permanent staff, or want to remove the details of technology management from the immediate office, Garrison Systems can be contracted to work on short, or long, term DBA assignments. This assignment can consist of 1-2 people to as many as several specialists depending on the demands and complexity of the computing environment.

If you are more apt to contract part-time support of the Progress DBA environment, please see the notes on Supplemental Staffing.

Notes:

- This work is considered fulltime (as much as 24x7x365) yet can be performed remote (if the network allows outside access) or onsite.
- As always, if the customer can provide other specialists such as UNIX Administrators, etc it will always be appreciated. Typically there are still Business Subject Matter Experts (SMEs) that are still needed to act as a reference for business change related matters.
